

Windscreen / Mesh Measurement Guidelines

Height measurement should be one inch from the top to one inch from the bottom of the fencing.

If fence poles are on the SAME side of the fence that the windscreen is going on, measure pole to pole sections

If fence poles are on the OPPOSITE side of the fence that the windscreen is going on, measure entire length of the fence.

All Stadium/Bleacher/Fence Mesh/Windscreen will have sewn in WEBBING & Grommets every 2 feet to increase durability/strength
